

From Living Room to Arena:
A Scalable Web Meeting Platform
for Network Marketing Events

WebMeet™ for Network Marketing

A compliant, fully branded meeting platform for fast, predictable growth.

Your opportunity meetings, product presentations, and team trainings deserve more than a generic video app. WebMeet™ gives network marketing companies a web meeting platform they can actually own, brand, govern, and monetize—while making it simple for every distributor to present like a pro.

The Challenge: Generic Tools, Real Risk

Most video platforms were never designed for the way network marketing works.

- Distributors build presentations from scratch, often off-message or non-compliant.
- Guests see the tech provider's brand, not yours.
- Links to files, videos, replays live everywhere except where the meeting happens.
- Corporate has little control over what is actually being shown in the field.

The result: inconsistent messaging, compliance exposure, brand dilution, and missed revenue.

WebMeet™ is built specifically to solve these problems for network marketing companies.

Put Your Brand at the Center of Every Conversation

With WebMeet™, your company – not a third-party vendor – is the hero of every meeting.

- **100% company-branded experience**
Your logo, colors, and domain from invite to replay. Guests feel like they are dealing directly with your company and your leaders.
- **Branded rooms for every distributor**
Give every field leader and rising star a professional, company-branded meeting room in minutes. They present under your brand, with your story.
- **Consistent global presence**
Roll out country-team-or program-specific branding while maintaining corporate consistency and control.

Lock In Compliance. Unlock Duplication.

Compliance and duplication are at the heart of sustainable network marketing.

WebMeet™ supports both.

- **Corporate-controlled core presentations**
Upload and lock your official product, opportunity, and compliance slide decks and videos. Distributors use the exact presentation you approve—every time.
- **Optional personal add-ons**
Allow the field to add their own supporting slides and documents, without altering the core corporate content.
- **Instant content updates, fieldwide**
When you update a slide deck or legal disclaimer at corporate, the latest version is automatically available in every distributor's meeting room. No more old PDFs floating around.
- **Faster onboarding and duplication**
New distributors can host a compliant, on-brand opportunity presentation from day one—no design, tech skills, or content creation required.

A Complete Presentation Hub in the Meeting Room

WebMeet™ brings everything your distributors need into one place: the meeting room itself.

- **In-room content library**
Slide decks, videos, PDFs, price lists, order forms, FAQs—organized in folders and ready to present.
- **Smart file visibility**
Hosts choose what guests can see and when, revealing files at the right moment in the conversation.
- **Low-bandwidth optimized presentation**
Slides and videos stream through the platform, reducing dependence on heavy screen sharing. Meetings stay smooth on weak Wi-Fi and mobile data.
- **No tech distractions**
Presenters are never forced to expose their desktop, notifications, or unrelated browser tabs during key presentations.

Turn Invitations into a System with Video Postcards

Getting people to show up is half the battle. The built-in Video Postcard Studio helps your distributor members invite more effectively.

- **Personal video invites at scale**
Distributors record short, branded video messages and send them as invitations that drive guests directly into live meetings or funnels.
- **Distraction-free viewer**
Guests watch your message without ads, competitor suggestions, or unrelated content.
- **Built-in calls-to-action**
Send viewers to register for a live opportunity webinar, place an order, join a follow-up call, or watch the next video in your process.
- **Corporate guardrails**
Headquarters can set policies on usage, manage templates, and control what's available to the field.

Built for Team Calls, Events, and Global Growth

Whether you are running a small team huddle or a global launch event, WebMeet™ is designed to scale with you.

- **From living room to arena**
Use the same platform for one-to-one presentations, home meetings, leadership calls, and large events with thousands of participants.
- **Browser-based, no downloads**
Prospects and distributors join from a link in their browser. No plug-ins or software installs to slow them down.
- **Breakout and leadership rooms**
Move into private rooms for leadership coaching, rank advancement planning, or post-event action sessions.
- **Global-ready infrastructure**
Cloud-based architecture and modern streaming technology support your international teams as they expand into new markets.

Protect Your Brand, Your Data, and Your Future

Network marketing companies face unique reputational and regulatory risks. WebMeet™ is built with that reality in mind.

- **Compliance-aligned architecture**
Control what is presented, how it is presented, and what is stored—supporting your internal and external compliance programs.
- **Enterprise-grade security**
Encrypted meetings and recordings, strong host controls, waiting rooms, and controlled access help keep unwanted guests out.
- **Your platform, not someone else's roadmap**
As a white-label partner, you are not just another user. You can work with us to align future capabilities with your compensation plan, training model, and international strategy.

Turn Your Meeting Platform into a Product

WebMeet™ is not just a cost line item. It can become a revenue-generating product in your compensation ecosystem.

- **Offer branded meeting rooms as a service**
Include a branded WebMeet™ room in enrollment packs, leadership qualifications, or monthly business tool subscriptions.
- **Recurring revenue alignment**
The same subscription model that drives our technology can help support your own recurring revenue and tool-based commissions.
- **Flexible packaging**
Bundle WebMeet™ with digital academies, coaching programs, marketing systems, or back-office tools under your brand.

See how a fully branded, compliance-ready meeting platform can help your organization enroll, train, and duplicate more effectively.
